*Please read and sign the reverse side and return form to the front desk staff.*

## Foot Orthotic Information

Foot orthotics are prescribed devices worn in shoes to improve abnormal motion of the foot. The use of foot orthotics can reduce or eliminate discomfort and pain in feet, ankles, knees, hips and/or back. Although orthotics does more than serve as arch supports they do not permanently correct or change a persons anatomy.

Several factors such as style requested, type of footwear, duration of pain, severity of symptoms and patient compliance contribute to the success of orthotics. Other health factors may also play a role in foot comfort (disorders such as neurological, circulatory problems, severe arthritic changes etc.) Because of the effects that these factors have on the success level of any orthotic, Fit Right Orthotics does not guarantee the outcome.

Fit Right Orthotics will do any necessary adjustments for our patients at no charge up to one year after the date on which the patient received their orthotics.

Custom made foot orthotics and footwear are specially made for your foot; therefore, they are a non-refundable product.

Please note MSI does not cover our services. It is your responsibility for your information and reimbursement for your insurance.

I have read and fully understand the above document.
